

Total War Map Layout

Note: Essentially the same layout as in the earlier *Fire in the East* game except: 1) The portions of Sweden and Central Norway that are not used in the game and would appear on the western half of map 101 are replaced by the Master Terrain Key, and 2) maps are 36x52 hexes instead of old 33x51 hexes with increased size used to show more of the Volga River valley along the eastern edges of the maps.

This will easily fit on a 4x8 foot table.

3/4 inch (1 hex) overlap
